25X1

1. A plant believed to be producing military equipment is located near Legnica (Liegnitz), in the woods located in the triangle formed by three railroad junctions: Rudna-Gwizdanow (Raudten-Queissen), Scinawa (Steinsau/Oder), and Legnica. A spur railroad leads to the plant area. Freight trains are brought to the edge of the wood and then abandoned by the crew; the train is taken over by a railway crew from the plant. The same procedure is observed when the trains leave the area.
2. The wood in which the plant is concealed is surrounded by barbed wire entanglements, with searchlights mounted alongside. The grounds are patrolled by the KBW (Corps of Internal Security) with police dogs.
3. The plant's employees consist mainly of prisoners under long-term sentences. The production of the plant is not known.¹

25X1

1. Comment: a tank factory was located near the railroad track in Legnica. It is possible that this is the same factory referred to in this report. the entire labor force of this tank factory consisted of Soviet soldiers.
